You Can Create a Class Website

October 17, 2009
Azusa Pacific University

Shelley Owen and Katie Warren,
Facilitators

Would you like to create a classroom Web site but don't have time (or money) to master complicated software? You can do it here! Building a class Web site is fun, easy, and absolutely free. The only question is where to begin. Shelley Owen and Katie Warren, will get you started using Google's Blogger and Google sites, as well as the innovative, dynamic new tools at <http://edu.Glogster.com>.

Create a web page in less time than you thought possible. Teachers can use a Web site to enhance classroom instruction and promote communication. Come, learn, and share your ideas!

Google Tools for Educators

January 23, 2010
Valley View School, La Crescenta

Nancy Moore,
Facilitator

Test drive Google's latest and greatest free online tools with Nancy Moore, Instructional Technology Outreach Consultant at LACOE, as your driving instructor!

Engage and empower your students as you enrich the learning environment. Google has created a suite of free web applications that can help teachers integrate technology into their curriculum. In this workshop, participants will find examples of innovative ways to use these tools in the classroom. Make a web page, an interactive map, an online presentation and more. Come and learn why teachers are crazy about Google!

Build Literacy with Free Technology

March 20, 2010
Village @India Hill, Pomona

Members of the SGVCUE Board,
Facilitators

SGVCUE Board shares their favorite book-marks for literacy! This workshop features hands-on exploration of free links and activities on the Internet to support ELA and ELL curriculum and assessment. Your Board members come from a variety of teaching backgrounds and experiences, so expect a great diversity of resources, tips, tricks and treasures for all grade levels and teachers. It's all about sharing! We'll show you how to save our favorites to your favorites. Bookmark this Coffee Break today!
